

SALESPAD®

DataCollection

DataCollection GP

Manage Your Warehouse, Efficiently.

DataCollection is a Windows® Mobile or IOS® enabled barcode data collection application that integrates fully with Microsoft® Dynamics GP.

Combined with the functionality of Microsoft Dynamics GP, and, optionally, SalesPad GP, DataCollection users can enter purchase receipts, and print bar-coded receiving or fulfillment paperwork and item barcode labels in one application.

With DataCollection operating on a Windows Mobile or iOS device equipped with a scanner, users can scan receipts of a product, locate inventory, and scan products for bin transfers or as they are fulfilled to orders. Additionally, users can do inventory adjustments, stock counts, return items to inventory, enter reason codes, confirm merchandise quantities to be shipped, and much more.

DataCollection GP is available in Mobile, Console, Advanced Console, and Warehouse Management versions in English and Spanish languages.

Features in Mobile
